

HADI HASSAN

AI Engineer | Data Scientist

+92 314 5624600 • Islamabad, Pakistan

hadipk110@gmail.com • hadihassan5.github.io/Hadi-Portfolio

SUMMARY

BS Computer Science student specializing in Machine Learning, Deep Learning, and Python-based AI application development. Experienced in building GenAI-powered assistants, image classification models, and multi-agent data analysis systems. Strong foundation in data manipulation, statistics, and practical software engineering workflows.

EDUCATION

Bachelor of Science in Computer Science, FUUAST	2024 – 2028
Intermediate (ICS), IMPC H-8/2	2021 – 2023

SKILLS

Programming Languages	Python, SQL, PHP, JavaScript, HTML/CSS
AI & Machine Learning	OpenAI API, Google Gemini API, Groq (Llama-3), LangGraph, TensorFlow, EDA
Libraries & Frameworks	Pandas, NumPy, Matplotlib, Seaborn, Streamlit, Flask, React.js
Tools & Version Control	Git, GitHub, MS Excel

EXPERIENCE

Web Development Intern COM19 Solutions	Oct 2025 – Dec 2025
- Developed and optimized full-stack web application features utilizing React.js for frontend interfaces and PHP/Python for backend logic. - Designed and integrated SQL database queries to support efficient data storage and retrieval workflows. - Utilized Git and GitHub for version control, collaborating with the development team through code reviews and agile workflows.	

PROJECTS

CERTIFICATIONS

- AI & Data Science – SMIT
- Data Science & Analyst – HP LIFE
- Web Development Fundamentals – IBM SkillBuild
